

Sergey Sova

Senior Frontend Engineer Armenia (Remote / Relocation-ready)

+37455544011 · work@sergeysova.com · [GitHub](#) · [LinkedIn](#)

Summary

Product-focused **Senior Frontend Engineer** with 10+ years of experience building modern web applications and UI platforms. Specialized in **React**, **TypeScript**, and **Effector**, with strong skills in frontend architecture, component libraries, and performance optimization. Proven success in startup environments — from launching video generation tools to building flow editors — with a deep understanding of business-technical alignment, team collaboration, and cost-saving design. Contributor to OSS, mentor, and architectural decision maker.

Skills

- **Languages:** TypeScript, JavaScript (ES6+), HTML, CSS, Node.js
 - **Frontend:** React, Effector, Redux, Next.js
 - **State Management:** Effector, Redux, MobX, Nanostores
 - **Tooling:** Vite, Webpack, ESLint, Prettier, Remotion, Electron, Git
 - **Testing:** Vitest, Jest, React Testing Library, Puppeteer
 - **Architecture:** Modular/FSD, DDD, SSR, CLI tools, Microfrontends
 - **Soft Skills:** Mentoring, Hiring, Communication, Product-thinking
-

Professional Experience

Performante — *Remote (Armenia)*

Performante is a company specializing in developing AI tools for automating video content creation, including platforms like BigMotion.ai and ScreenStory.

Senior Frontend Engineer · June 2023 – Mar 2025

ScreenStory — Desktop video editing app with Electron + React

- Refactored legacy UI core and implemented timeline editor (snapping, dragging, resizing)
- Built modular UI controls using Effector → reduced bugs by **40%**
- Introduced test coverage and stabilized release process
- Mentored junior → promoted to senior

BigMotion.ai — AI platform for short video generation

- Designed frontend architecture for AI video generation pipeline
- Integrated Cloudflare to reduce infra costs → saved **50%**
- Created ADRs, conducted interviews, helped scale product team
- Supported rapid iteration with maintainable codebase

Tech stack: React, TypeScript, Effector, FeatureSliced, Electron, Node.js, Serverless

Selzy — *Remote*

Selzy is an AI-powered email marketing platform offering automation, segmentation, and real-time analytics for small and medium-sized businesses.

Senior Frontend Developer · *Sep 2022 – Apr 2023*

- Built visual **flow editor** for email automation → opened new monetization channel
- Introduced testing culture → improved reliability, reduced client churn
- Implemented i18n → enabled international expansion

Tech stack: React, TypeScript, Redux, Webpack, Jest, Node.js

Haiku — *Remote*

Haiku delivers remote engineering talent for startups and growing companies.

Chief Technical Officer · *Oct 2021 – Sep 2022*

- Managed 5 frontend teams, aligned stacks (React, Effector, TS)
- Conducted final tech interviews, built team development plan
- Mentored leads, standardized architecture and component design
- Wrote internal guides and ran internal workshops

Tech stack: React, TypeScript, Effector, Webpack, Jest

Mission:Luna — *St Petersburg, Russia*

Mission:Luna is a product company developing internal tools for business process automation.

Head of Web Development · *Nov 2020 – Oct 2021*

- Launched frontend team from scratch: hired, onboarded, set up review processes and code standards
- Introduced internal dev handbook and CI flows → accelerated onboarding
- Built structured review process and backend API spec approval
- Implemented code base for initial three projects

Tech stack: React, TypeScript, Effector, FeatureSliced, Webpack, Jest, Testing Library

Redmadrobot — *St Petersburg, Russia*

Redmadrobot is a leading Russian digital agency with enterprise clients.

Frontend Lead · *Jul 2019 – Nov 2020*

- Formalized review pipeline (API, code, release) → improved delivery quality
- Delivered multiple Javascript-based projects to production
